WORK EXPERIENCE

SportsMEDIA Technology

November 2019 – Present

Application Developer

Jacksonville, FL

- Work with a large team involved in high complexity source code development for products used at professional sporting events.
- Responsible for implementing features, changing functionality, refactoring code, and fixing bugs for large scale software products.
- Work in a very high-pressure environment with strict, non-negotiable deadlines.
- Agile work environment with daily standups and continuous deliveries of software products.

LongHorn Steakhouse

January 2016 – November 2019

Server

Jacksonville, FL

- Worked as a server while I completed my bachelor's degree in Computer Science.
- Fast paced, high pressure, customer facing role with a heavy emphasis on time management, customer service, and teamwork.
- Routinely was a top server in all metrics used to evaluate performance.
- Responsible for training new employees and getting them to the standard of the company.

Baptist Medical Center

June 2015 – January 2016

Technical Deployment Technician

Jacksonville, FL

- Worked on a team to deliver and install technical equipment to hospital staff at multiple locations.
- Worked on large scale, hospital-wide projects under project managers and team leads with strict deadlines.
- Responsible for helping hospital staff with technical needs while onsite if issues arose.
- Customer facing role with a heavy emphasis on customer service and interpersonal skills.
